KTech Introduces an IP Gateway Product

Chatsworth, CA – Oct 26, 05 - KTech Telecom, a leading provider in Digital Broadcast and Digital Cable technologies, has launched an IP Gateway product, model number: DVM-2400.

Housed in 1RU rack space, this unit performs conversion from GigE to ASI or ASI to GigE signals. In addition, the unit is also capable of digital video decoding in SD format using pluggable modules.

Application – Digital Cable Head-Ends

KTech's unique hot-pluggable design allows this compact 1RU chassis to provide users with GigE/ASI signal conversion. There are available hot-plug modules to expand its capability to MPEG2 SD digital video decoding to NTSC and Audio signals, up to 6 channels maximum.

About KTech Telecom

Since 1995, KTech is a manufacturer of professional digital Broadcast and digital CATV Head-End equipment. Its products include GigE Decoders, 8VSB modulators, HD/SD decoders, SMPTE-310M to ASI, Converters, and 8VSB digital processors. Visit www.ktechtelecom.com for more information
