GigE-to-HDSDI Decoder Product

Chatsworth, CA – Apr 21, 06 - KTech Telecom, a leader in Digital Broadcast and Digital Cable technologies, has announced a new product for digital convergence in GigE signaling and will be demonstrating at the NAB 2006 Broadcast show in Las Vegas during Apr 24~27, 2006.

Model No: DVM-150E is an HD and SD Decoder Product and Ktech has added a GigE input/output option. With this feature, users are able to decode GigE MPEG2-over-IP signals into HDSDI, YPbPr, and RGB outputs. The GigE option is capable of receiving IP and generating IP signals.

Application – All Digital Cable Head-Ends

KTech's DVM-150E with GigE option offers the capability of receiving an MPEG2-Over-IP and decoding it into HD decoded signals. The unit is also capable of receiving RF, convert to IP, and decode HD/SD signals into HDSDI with embedded audio, SDI with embedded audio, YPbPr, RGB, and NTSC.

About KTech Telecom

Since 1995, KTech has been a manufacturer of professional digital Broadcast and digital CATV Head-End equipment. Its products include 8VSB modulators, digital demod/decoders, SMPTE-310M to ASI, IEEE-1394 Converters, and 8VSB digital processors. Visit www.ktechtelecom.com for more information
