KTech Introduces a simple 1-to-8 ASI Distribution Amplifier

Chatsworth, CA – June 15, 05 - KTech Telecom, a leading provider in Digital Broadcast and Digital Cable technologies, has launched ASI Distribution Amplifier (DA) product.

Housed in 1RU rack space, this unit performs a very simple ASI distribution amplification function. The unit accepts 1 ASI input, equalizes for its cable losses, re-clocks and generates 8 identical ASI output signals.

Application – Digital Cable Head-Ends

KTech's ASI-0108 product can be used in any ASI distribution application needs. Many CATV head-end and broadcast facilities require ASI signals and amplifications. Rather than using very complex ASI distribution products, Ktech's unit address the market with a very simple product that duplicates the ASI signal in a 1RU box.

About KTech Telecom

Since 1995, KTech is a manufacturer of professional digital Broadcast and digital CATV Head-End equipment. Its products include GigE Decoders, 8VSB modulators, HD/SD decoders, SMPTE-310M to ASI, Converters, and 8VSB digital processors. Visit www.ktechtelecom.com for more information
